# Unified Consciousness and World Civilization

Rev. C.L. Gulati

*President,  
Sant Nirankari Mandal, Delhi-9*

Human life is a unique blessing for linking soul with God, the omnipresent mainstream of consciousness. Great philosopher Saint Augustine of Hippo writes, "Restless are our souls, until they rest in thee my God". On his deathbed renowned philosopher Oscar Wilde asked, "Why has destruction such a fascination?" And he himself answered, "we are no longer captains of our souls". As we cannot think of using pen without ink within, we cannot think of world civilization without enlightenment of our soul within!

## **A Spiritual Issue**

True religion is a vehicle of spiritual enlightenment, social consciousness and cultural values which are the best suited to address the problems of life. It was exactly this kind of religion in his mind when William Burke claimed that the religion is the foundation of the Republic of Mankind, the basis on which all true Civil Governments rest, and from which power derives its authority, laws, their efficiency and both their sanction.

## **Culture sans consciousness**

Death of a body is not such a great loss as the death of conscience. After afflicting the conscience, the virus spreads to the head in heart with greed and graft. The virus may not cause physical death, but it causes the death of all human values and whatever is good and virtuous. Such a culture can not promote unified consciousness as the bedrock of world civilization.

Civilization is another name of humanism which is the outcome of spiritual awakening. Therefore, world civilization has not to be merely collective but the unified consciousness essentially born out of actual knowledge of one God for all, which results spontaneously and simultaneously in the sense of organic unity of mankind. It is like a blood relationship. It means humanity is of each other whether you are Christian, Jew, Muslim or Hindu. We desperately need the feeling of cosmic kinship that inherently results from the realization of One Source.

---

Civilization is another name of humanism which is the outcome of spiritual awakening. Therefore, world civilization has not to be merely collective but the unified consciousness essentially born out of actual knowledge of one God for all

---

Austrian Quantum Physicist, Erwin Schrodinger is known for the phrase, "the total number of minds in the universe is one. In fact, consciousness is a singularity phasing within all beings". The phrase implies that apparent multiplicity of minds is just an illusion and that there is only one mind or one consciousness that expresses itself in a myriad of ways. In such a world view, a separation between subject and object does not exist. In a world without the subject-object split, we are all an expression of the One. On the same point, Max Planck says, "I regard consciousness as fundamental, I regard matter as derivative from consciousness."

### **One religion from all**

In the absence of actual knowledge, God is different for different persons and for the same person on different occasions. The concept of one God for all foresees the idea of one religion for all that suits the whole human race. The Sant Nirankari Mission has succeeded in achieving this objective through a living revelation of Fatherhood of God, the central seed of all religions, ruling out any question of religious conversion.

**Albert Einstein told us that**, "everything is energy"; that "a human being is a part of the whole called by us [the] universe". His words echoed the most ancient of spiritual and philosophical teachings and still underpin today's cutting-edge scientific discoveries.

He says, Universal Mind goes by many names viz. Unified Field, Universal consciousness and in religion we call upon God who himself goes by many names - Jehovah, Allah and Brahman.

Each and every one of us is a manifestation of this single Universal Consciousness. We are all connected - not only to each other but also to all of Nature and to everything in the Universe.

Connecting with a unified consciousness (God) is normally understood as meditation. But it does not need any meditative process. It needs getting a connect with the True Master (satguru) who reveals God with a combination of spoken words and practical hint about the Omnipresent God. Arjuna did not meditate or do any practice. He just listened and accepted whatever Lord Krishna told him. Once we know and experience God, his remembrance becomes spontaneous and natural process. Our walking, talking, eating and sleeping in God would all turn meditative in true essence. Spiritually essentially means to **"Know One, Believe in One and Become One"**. Satguru is the oldest and newest in the world like day and night following each other and still ever new. (Atharva Veda 10:8:13)

Her Holiness Satguru Mata Sudiksha Ji Maharaj, the spiritual Head of the Mission, says that **"Life gets a meaning, if it is lived for others"**. It combines the theory of mutual relationship through spiritual awakening with the innate spirit of living for others blossoming world civilization in full spring.

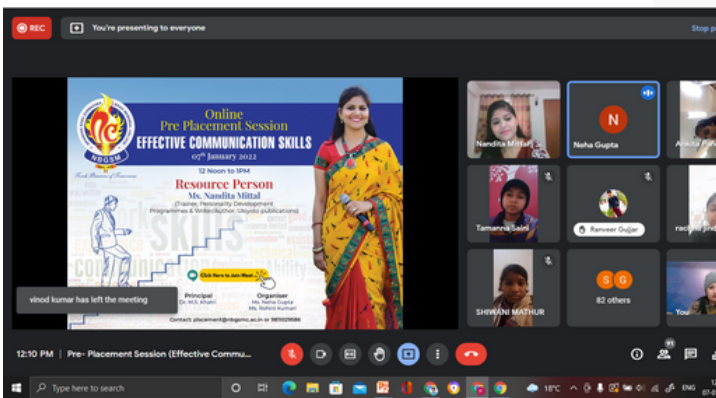

# N.B.G.S.M.C. EVENTS

## Extension Lecture

01<sup>st</sup> January 2022 | Extension Cell

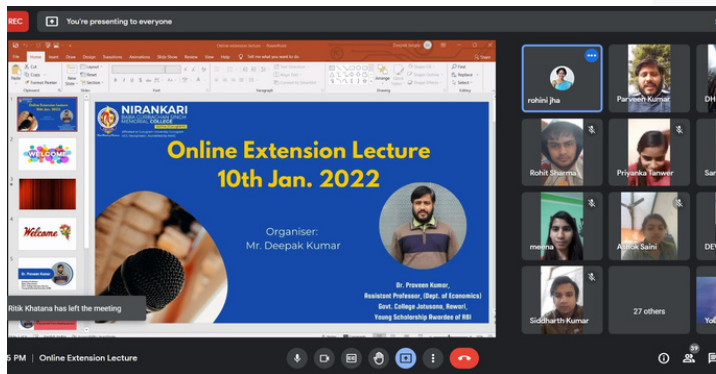

Extension Cell of N.B.G.S.M. College, Sohna organized an Extension Lecture for the students of Bal Bharti Vidya Niketan Mandir School, Sohna on the topic 'Importance of Education'. The speaker shared that education is a ray of light (knowledge) in the darkness (ignorance). Moreover, students asked their queries in the Q & A session. The teachers and students of the school acknowledged the efforts made by the cell in sparing their valuable time for the students.

## Pre-Placement Session
